Re: B.P. Minerals
Barney's Canyon Project
Truck Wash

Dear Mr. Ramsey:

We have reviewed your 22 May letter concerning the proposed truck wash facility and have the following comments:

- a. The procedure described for removal of ice from the wash pad during freezing conditions must be described in the operation and maintenance manual.
- b. Removal of ice utilizing a front end loader must be considered as a practice which will damage the pond's bottom which consists of 6 inches of clay.
- c. The procedures for separation of oil and grease from pond water must be stated in the operation and maintenance manual.
- d. The plan must show the pad concrete thickness and the pond plan and depth dimensions.

The proposal must be modified to address these comments. Please call if there are any questions.

Sincerely,

Charles G. Dietz, P.E.
Environmental Engineer
Bureau of Water Pollution Control
